E-LEARNING WEB PORTAL-

A place for Students. Mentors and Recruiters

THEME- EDU-TECH

Team US

PROBLEM STATEMENT

The enormous number of layoffs due to COVID19 and difficulties faced by students due to the closing down of their institutes inspired us to do something about providing users with the best opportunities.

A lot of ex-employers spend hours surfing the web to find a job.This lockdown also provides them ample time to give back to society by helping the younger students out there and earn money.

Students find it difficult during lockdown to have proper mentorship regarding studies It would be a great help for students to get a mentor for helping them to develop skills and project.

SOLUTION

Our E-learning portal gives students an opportunity to connect to mentors from different parts of the world and to learn from their experiences. It will also works as a peer to peer network, that lets students help each other out through a community of similar interest.

SOLUTION

This portal provides ex-employers with an opportunity to earn an additional income and a chance to help the young students and developerswho are seeking their help. This would also help them sharpen/revise their skills. Also through the platform top-performing candidates, gets an opportunity to land in an interview with a recruiter of their choice.

SOLUTION

Recruiters find to hard to find the right candidates from the plethora of applicants. Our Portal provides recruiters the opportunity to connect with our top-performing candidates (who have passed our skill verification test).

TECH STACK

FRONTEND	HTML,CSS,JAVASCRIPT
BACKEND	PYTHON
DATABASE	SQLITE

Architecture

PLANNING

- PROJECT PLANNING
- DEFINING MODULES
- DECIDING WORKFLOW

DESIGNING

- PROTOTYPING
- USER INTERFACE
- USER REVIEW

IMPLEMENTATION

- IMPLEMENTATION OF DIFFERENT MODULES
- GAMIFICATION
- COMMUNITY SECTION
- CHAT BOT
- E-COMMERCE PAYMENT

FUTURE SCOPE

1. **TIMETABLE WITH NOTIFICATION FACILITY**, to give reminders to students and help them stick to a schedule

2. **E-LIBRARY** for the best resources combines in a single place.

3. **COMPETITIONS**- A place to conduct hackathons, coding competitions
